WESTHAUSER NURSERIES

Quality Plants Northern Grown

SAWYER, MICHIGAN

We Raise the Fertility of Our Soil with Carloads of Manure Every Year to Give You Sturdier Plants.

Discing Under Heavy Cover Crop to Supply Humus and Minerals to Our Lands.

OUR SUPERIOR QUALITY at No Extra Cost

Here we are preparing land a year ahead of planting. Note the 3-5 foot vegetation we plow under, which supplies the soil with an abundant amount of Humus and Minerals which are so necessary to produce the heavy rooted quality nursery stock.

MICHIGAN STATE DEPARTMENT OF AGRICULTURE ORCHARD AND NURSERY INSPECTION Certificate of Nursery Inspection, No. 6123.

This is to certify that the Nursery Stock and Strawberry Plants of Wm. Westhauser, Sawyer, has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant disease.

JAMES F. THOMPSON, Commissioner.

This Certificate to be void after September 15, 1936.
Bureau of Agricultural Industry,

A. C. Carton, Director.

E. C. Mandenberg,

In Charge of Orchard and Nursery Inspection.

Lansing, Mich., November 4, 1935.

OUR
EXTRA HEAVY
BEARING STRAIN
CANNOT BE COMPARED
WITH ORDINARY HAP-
HAZARDLY GROWN STOCK

They are the results of Long Experience, Careful Selection of Breeding Stock over a long period of years, Good Soil Management, up-to-the-minute Farming Machinery. WESTHAUSER Strains will in turn produce a heavy yield and pay large Dividends for his Customers.

OUR NORTHERN CLIMATE is ideal for growing hardy nursery stock, because we are located so near Lake Michigan, which puts a damper on our winters, making the climate such that our nursery stock is practically dormant until late in the spring. Bear in mind, Mr. Fruit Grower, plants that are dormant so late in the season have little foliage and carry well in transit. That is one reason why our plants can be shipped long distances with the best of results.

Beware of Cheap Plants

By fly-by-night nurserymen who have little or no acreage of their own and offer their product at very low prices. They depend on any berry grower who is willing to dig some plants between his fruiting rows. Of course such plants are small and undeveloped and can be bought almost at any price. Result, quite often a bunch of half-starved, mixed plants. You would not consider buying scrub livestock for breeding purposes. Why buy scrub nursery stock?

R. E. Westhauser.

Westhauser has Scored Again with a Crop of HEAVY ROOTED NEW LAND Strawberry Plants

On the presentation of our 1936 Catalog, we take this opportunity to thank you for your support in past years. Our records show that our satisfied customers are the backbone of our business and we treasure their good will very highly. We have not only weathered the worst depression this country ever experienced, but have continued to progress when others were handicapped by the lack of working capital and had to economize on fertilizer, etc. Now we are prepared to supply our customers with the best nursery stock obtainable.

OUR BROAD Guarantee PROTECTS YOU

We guarantee that our plants are first class in every respect, free from disease, freshly dug, true-to-name and we hold ourselves ready upon proper proof to return your money or replace stock. We further guarantee that our plants will reach you in good growing condition.

OUR PLANTS
Are in a
Class by
Themselves
says
D. C. Franks

Only your system of selecting strong healthy plants, planted on new or heavily fertilized land could produce such wonderful plants as you have shipped me.

There is no comparison with plants I have had from other nurseries, your plants are really in a **CLASS** by themselves.

D. C. FRANKS.

Westhauser's Original Strain New

Over 5000 Quarts on One-half Acre — No Crop Failures

HISTORY OF GRAND CHAMPION AS RECEIVED FROM THE MAN WHO DISCOVERED THIS OUTSTANDING VARIETY

We found Grand Champion as a single seedling growing on a decaying stump. This seedling produced 30 plants. The next spring we dug 300 plants for re-planting, and harvested 105 quarts of selected berries on space 66 square feet.

OVER 5000 QUARTS ON ONE-HALF ACRE

Two years later, in spite of heavy frosts while they were in bloom and almost continuous rain during harvest, we picked over 5000 quarts of berries from ONE-HALF ACRE.

NO CROP FAILURES ON ACCOUNT OF SPRING FROSTS

The plants are large, the foliage is heavy, which protects the blooms in early spring from freezing. This is not the only protection. It would not be saying too much if we called Grand Champion the spring EVER-BEARER, for we have picked Strawberries for 40 days on account of its continual blooming. Crop failure is almost impossible. Grand Champion side by side with Aroma, was LOADED with fruit, while Aroma had a very light yield.

ALL SEASON BEARER

Ripening with Premier, bears during the entire spring Strawberry season and still competes in quality with the Aroma, which is a late berry and is grown here almost exclusively.

What a Customer Says About Our Grand Champion

Westhauser's Nurseries,
Sawyer, Mich.

Gentlemen: Last spring I bought 2000 Grand Champion Strawberry plants from you and I want to tell you what fine success I had with these plants.

Grand Champion beats them all for size, appearance, and fine quality. I grow only the better kind of Strawberries. My customers paid me a premium on Grand Champion and I always was sold out of them first. Not only are they larger than any other variety, but there were twice as many of them and picking was a pleasure and most profitable.

GRAND CHAMPION

on Account of Spring Frosts

THE BERRIES

For canning and preserving are in a class by themselves as they are coreless and retain their shape and flavor in the can. Their rich red color, the extra large size, beautiful appearance and high quality attract the fancy berry buyer. We have received premium on our Grand Champion ever since we have grown them.

PRICES REDUCED

Last year we were sold out long before the season was over, although we have more plants this year, but for the fact that we have reduced the price, we anticipate a very active demand. Play safe and order early, thus having your plants reserved.

THIS IS WHAT A FRUIT BUYER HAS TO SAY ABOUT GRAND CHAMPION

Benton Harbor, Mich.
Westhauser Nurseries, Sawyer, Mich.
Dear Sir: I have your letter of recent date, in which you ask my opinion as to the quality of the New Grand Champion. I bought this variety almost exclusively since they came in bearing from the originator. In loading carloads of Aroma Strawberries I have paid this grower a premium on Grand Champion. Of course, I have received a fancy price for them on the Chicago market on account of the large size and fancy appearance.

GUST BALDACCINI.

On this page we present to you a true picture of our heavy-rooted, hardy northern grown, new land Grand Champion plants.

Westhauser's New Wayzata Everbearer

(DELICIOUS HONEY SWEET)

Our foundation stock was bought from the originator. We have further improved this variety by growing them on our fertile new land.

We have fruited them this year and they have outborne other Everbearing Varieties 2 to 1. At this writing on October 28, 1935, we have picked 7 crates of berries this day from one-half acre. The originator claims he picked from June, 1932, to Fall, 1932, 901 cases which sold for \$3,106.55.

FLAVOR

Without contradiction WAYZATA is the best flavored Everbearer grown (Delicious Honey Sweet). Prospective customers who have visited our fruiting fields and have sampled the Wayzata have invariably selected this berry for their planting, in spite of the price being higher than other Everbearing Varieties.

BERRIES

The Wayzata produces the largest berries of all Everbearers. They are evenly colored and are red to the heart. They can be shipped to long distance markets, being an extremely firm berry.

FOLIAGE

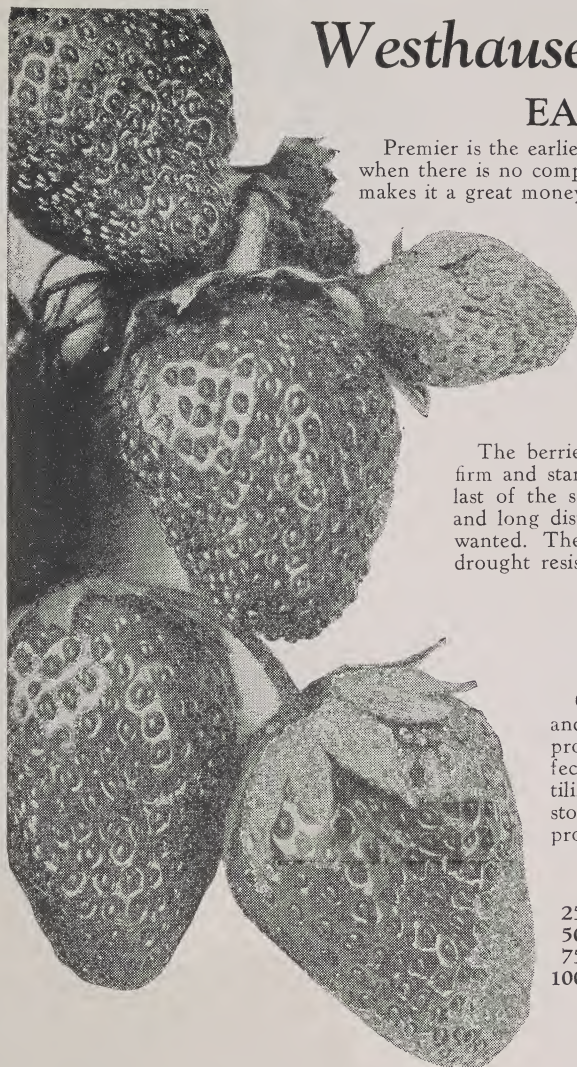

The foliage is dark green, stands 8 to 10 in. The crowns often multiplied 10-fold or more, which counts for their heavy fruiting quality. However, since they are so busy directing their energy to fruiting, they do not make as many new plants as other Everbearers. This is the reason that plants will be scarce for some time to come. (This, together with the demand, makes the price high). The demand is very active. Last year we returned lots of orders with money enclosed. Be wise, order early and have your plants reserved.

Westhauser's PREMIER

EARLY—PROFITABLE

Premier is the earliest Standard Strawberry to ripen. It gets on the market when there is no competition, thus it receives highest prices. This fact alone makes it a great money-maker.

Premier is Grown From Coast to Coast

Premier has proven a top-notch in all sections of the country over a period of many years. In some of the commercial growing Strawberry sections it is grown exclusively and deserves all its popularity.

Fancy—Hardy—Beauty

The berries are of a large beautiful glossy red appearance, very firm and stand long distance shipping well. It holds its size to the last of the season. Premier is supreme for eating, canning, local, and long distance marketing. It is a Strawberry for every purpose wanted. The plants are very productive, sturdy, long rooted, good drought resister and makes good on any kind of soil.

Westhauser's Improved Strain Are in a Class by Themselves

On our farms we have grown the Premier for 15 years and are known throughout the country for our vigorous, productive stock which has been built to its present perfection by extensive cover crops, manure, commercial fertilizer, new land elements and careful selection of breeding stock. Get started right and buy WESTHAUSER'S Improved Strain this year.

Surplus Spring Bearing Strawberry Plants

\$3.00 per 1000
Not Prepaid.

During our digging season every spring, at the end of each day, there are a few plants of all varieties left. We never carry plants over from one day to another, so that these plants are classed as surplus plants. We offer them to you who do not care to have named varieties, at \$3.00 per 1000. We will not label these plants as to variety, simply calling them surplus plants. They are first class plants, fresh dug and will bear you a fine crop. Do not write asking us to give you named varieties, for if you want named sorts, labelled, they must be bought at catalog prices. These plants will not be sold in less than 1000 lots. Simply send in your order saying Surplus Plants, and how many you want.

TOPNOTCHERS

BLAKEMORE

Extra Early

The Blakemore is a cross of Missionary and Premier, originated and developed by the United States Department of Agriculture. We have bought our foundation stock from that source.

Blakemore is a free plant maker and produces a heavy fruiting row on any kind of soil. The foliage is tall and heavy, and protects the blooms from late spring freezes. The berries are beautiful, glossy, bright red to the core. It has a tough skin, firm flesh and a wonderful mild and juicy flavor. An excellent canner and one of the few varieties that keeps its color after preserving.

Blakemore Has Proven to Be a Wonderful Long Distance Shipper

and will remain on the vines a considerable time after ripe without loss from over-ripeness. In some southern states

Blakemore has replaced some old-time varieties and is grown exclusively. Their long distance shipping quality is recognized more from year to year. During the extremely rainy season during Strawberry harvest, Blakemore last year in southern Illinois sold from 50c to \$1.00 more a case than other varieties as they arrived in good shape in spite of the unfavorable weather conditions and were shipped as far as Detroit, Chicago, and Milwaukee.

Blakemore.

Dr. Burrill

Million Dollar Strawberry

Resembles the Dunlap, ripens about one week later than Premier, is a strong plant maker on any kind of soil and a heavy bearer. The berries are a handsome deep red color. It cannot be beat as a dry weather producer. It is a fine canner and shipper.

The Dr. Burrill will make good under the most trying conditions. We recommend them to the beginner. Price: 25 for 40c; 50 for 50c; 75 for 65c; 100 for 70c; 200 for \$1.30; 300 for \$1.60; 400 for \$1.85; 500 for \$2.00; 1000 for \$3.95.

Dunlap THE OLD

STANDBY

Midseason

The berries are medium to large, conical and often slightly necked, dark crimson with a deep red flesh, quality very good. The plants are healthy and vigorous. Very productive. Grows on all kinds of soil, and in extremely cold climates. The best variety for canning and a good pollenizer for pistillate varieties. It can be shipped to distant markets. Holds up a long while after being picked. Season a few days after Premier begins bearing.

MASTODON Everbearer

Much has been said about Original Strain Mastodon Plants. Our foundation stock was purchased direct from the originator, Mr. Voer, but now Westhauser's Improved Strain Mastodon Everbearer stands supreme. They have been carefully selected, only the strongest plants are planted year after year.

Grown on New Land

The past few years our plants have been grown on New Land. **Result:** Plants with extra large root system and crowns. Any practical farmer or gardener can appreciate the high quality product of this mode of culture.

Double and Triple Your Crop - Plant Our Heavy Fruiting Strain

Since the vigor and energy of a plant is stored in the roots and crown, and since these plants have been improved each year by careful selection, such as we practice, you can readily appreciate that you get the best at no extra cost if you order your Mastodon plants from us. We sincerely believe that you cannot buy better plants no matter under what trade name advertised or price you pay, and we are willing to stake our reputation on the above statement.

What Westhauser's Selected Everbearers Will Do in Four Months After Planting

Photo Taken June 1st

Photo Taken October 1st, Four Months Later

Three Full Crops in 18 Months

When planted this spring, this wonderful variety will produce a crop in July and continue until late in fall. This year we had an early freeze. October 14th, the writer thinking that the berries were damaged, did not visit the farm for about 10 days. To his surprise he found a nice lot of berries. The next few days we picked forty-four 24-pt. crates, which sold in Chicago from \$2.00 to \$3.00 per crate.

Next spring these plants begin fruiting with the June varieties, and after a short lay-off they will again bear in late summer until snow flies.

The large size, fine quality and delicious flavor make Mastodon a marvel of Nature. No wonder the demand for plants has increased from year to year. The demand for plants exceeds the supply. Avoid disappointment, order early. Your plants will be reserved and shipped at the proper planting time.

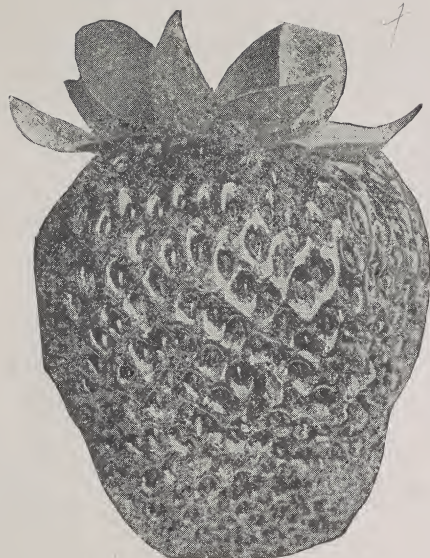

Surplus Everbearing Plants \$4.95 per 1000

500 for \$2.50.

First class freshly dug plants of which we have a surplus each day in our packing-house; rather than keep them over, we are offering them at a reduced price, these plants are not labeled, but consist of Everbearing varieties listed in this catalog.

Champion Everbearing

An improved Progressive that is raised extensively in some sections of the country. While the berries are not quite as large as the Mastodon it has a very good flavor and produces a good crop year after year. **Prices:** 25 for 60c; 50 for 85c; 75 for \$1.00; 100 for \$1.25; 200 for \$2.00; 300 for \$2.70; 500 for \$3.75; 1000 for \$7.50.

Big Joe.

BIG JOE CRAMPTON

Midseason to Late

A high quality, medium late Strawberry, at its best when the earlier varieties show a decline in size and productiveness. One of Chicago's leading hotels sends their buyer to our locality every year and they choose Big Joe for their daily supply. The color is medium red, very glossy and has a really fancy appearance. The first berries come in a double shape. The stems grow high and keep the fruit off the ground. It is a good plant maker. If you are looking for a productive medium late variety, plant Big Joe. Prices: 25 for 50c; 50 for 65c; 75 for 80c; 100 for 90c; 200 for \$1.65; 300 for \$2.20; 500 for \$3.00; 1000 for \$6.00.

AROMA

Late

A good late variety and long considered the standard late market Strawberry. It is still grown extensively in all sections of the country, but is especially popular in the southern states, where many fruit growers' associations plant Aroma exclusively. The berries are large, nearly round, and of firm texture, deep red in color and of good flavor, making it ideal for shipping. Although good yields are sometimes produced on light ground, Aroma is at its best on the heavier soils. Price: 25 for 45c; 50 for 60c; 75 for 75c; 100 for 85c; 200 for \$1.50; 300 for \$2.00; 500 for \$2.60; 1000 for \$5.25.

PEARL

Very Late

The latest of the spring-bearing Strawberries. It is practically frost-proof, as it has a heavy foliage that protects the blossoms from the cold. The berries are dark red to the heart, the skin rather tough, which makes it a good shipper, and the prominent yellow seeds give it a pleasing appearance. Supply your market with fancy berries and get top prices when all other varieties are gone. Be sure to include some of these in your order—the Strawberry family is not complete without this variety. Prolong your season and make more profit. Prices: 25 for 50c; 50 for 65c; 75 for 75c; 100 for 85c; 200 for \$1.55; 300 for \$2.00; 500 for \$2.75; 1000 for \$5.50.

BELLMAR

Extra Early

Bellmar, originated by the U. S. Department of Agriculture, is, like Blakemore, a cross between Premier and Missionary. It is outstanding for its glossy, bright red color and firmness, a wonderful shipper and canner. Bellmar makes a thrifty growth and many plants. We have a limited amount of this new variety. Order some and try them out in your locality. Prices: 25 for 45c; 50 for 65c; 75 for 75c; 100 for 85c; 200 for \$1.55; 300 for \$1.90; 500 for \$2.75; 1000 for \$5.50.

GIBSON

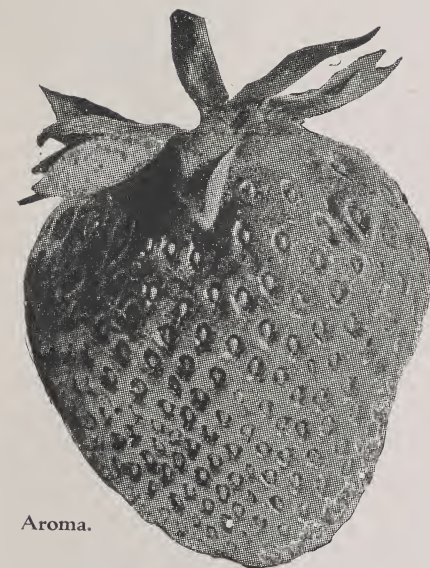

Midseason

The Gibson has been a favorite with the commercial grower everywhere for the past twenty years, and is grown in our Michigan Small Fruit Belt to a great extent.

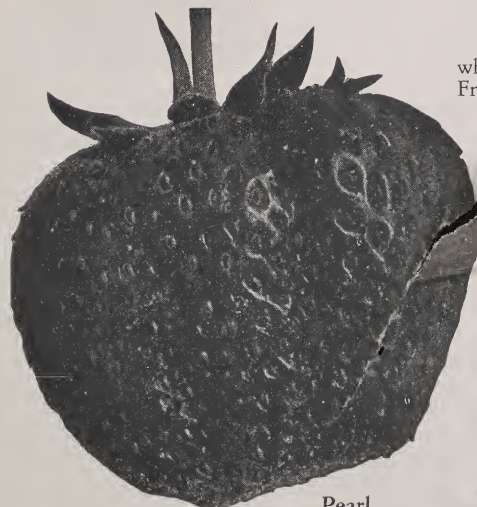

Extra heavy bearer and plant maker. We have never known this variety to fail to produce a heavy crop.

The berries are dark red, firm and hold their size to the last berry. Flavor is neither sweet nor sour, but just right for canning.

A Gibson patch lasts for years if kept free from weeds. Prices: 25 for 40c; 50 for 60c; 75 for 70c; 100 for 80c; 200 for \$1.40; 300 for \$1.85; 500 for \$2.25; 1000 for \$4.50.

DORSETT

NEW INTRODUCTION OF THE U. S. DEPARTMENT OF AGRICULTURE. A cross of Royal Sovereign and Premier (or Howard 17). Propagated by the U. S. Department of Agriculture and released four years ago for the first time.

PRODUCTIVENESS. On a test plot Dorsett produced at the rate of 6,640 quarts per acre, while Premier produced 4,520 quarts.

FOLIAGE. It is vigorous and healthy, upstanding, and has a very thrifty appearance. Nurserymen who visited our plant farms last summer were amazed at the healthy, upstanding foliage which was noticeable from a distance. The plants are large and compare with the Mastodon Ever-bearer plants. We are growing both Fairfax and Dorsett on new land, which accounts to a great extent for the extra large size of these plants.

SIZE OF BERRIES. The berries are considerably larger than those of Premier; color very desirable light red; beautiful in appearance, light red color and dark green cap; large size and attractive shape; will appeal to any buyer in the market for fancy berries.

FROST PROOF. This variety is too new to have definitely established itself as frost proof, but in the few years it has been grown there has been little frost damage. One of the largest berry growers in the East, who has grown extensively Blakemore, Bellmar, Premier, and other leading kinds, and also tested the Dorsett, says that he considers the Dorsett the most valuable variety he has grown, and if he were limited to one sort he would choose Dorsett.

PRICES: 25 for 50c; 50 for 65c; 75 for 80c; 100 for 90c; 200 for \$1.65; 300 for \$2.20; 500 for \$3.00; 1000 for \$6.00.

On the largest cash fruit market in Benton Harbor, Michigan, Dorsett and Fairfax brought 75c to \$1.00 more a crate last season than any other variety.

Above we present to you a true picture of our heavy rooted, hardy, northern grown, new land Dorsett plants. Just a sample of the sturdy plants we have to offer our customers for 1936.

FAIRFAX

Fairfax is a cross of Royal Sovereign and Premier (or Howard 17). The most outstanding characteristic of the Fairfax is its quality. It also compares favorably in other ways with the best of other spring-bearing varieties.

SIZE OF BERRIES. Berries of Fairfax average very large, even slightly larger than Dorsett, larger than Premier and Blakemore under similar conditions.

FROST RESISTANT. Although Fairfax has been fruited for a number of years and it begins blooming early no frost damage has been noted during that period.

PRODUCTIVENESS. In a test plot Fairfax produced at the rate of 5,110 quarts per acre, while Premier under similar conditions produced 4,520 quarts; but we want to bring out the fact very strongly that not only the amount per acre is in favor of Fairfax, but also the percentage of fancy berries.

VIGOR, HEALTH AND FOLIAGE. To produce a satisfactory crop of berries, a variety must have a healthy foliage. In that respect Fairfax is outstanding, having a thrifty, healthy, upstanding dark green foliage.

COLOR, APPEARANCE AND QUALITY. The berries are rich red with yellow seeds, very attractive. No berry (except Dorsett) can equal Fairfax in quality. It is impossible to describe it; to be appreciated it must be eaten. By all means test this wonderful new variety in your locality and reap the profit. Be the first to supply your neighborhood with this winner.

PRICES REDUCED. We were compelled to return money on many hundreds of orders last year, being sold out the latter part of the season.

PRICES: 25 for 50c; 50 for 65c; 75 for 80c; 100 for 90c; 200 for \$1.65; 300 for \$2.20; 500 for \$3.00; 1000 for \$6.00.

Here we present to you a true picture of our heavy rooted, hardy northern grown, new land Fairfax plants. Just a sample of the sturdy plants we have to offer our customers.

Both varieties have made good in all parts of the country. The demand for plants is very active and we predict a shortage of plants long before the shipping season is over. Protect yourself. Order early and have your plants reserved.

GEM—A Wonderful New Everbearer

We bought our foundation stock direct from the introducer, Mr. Frank Kep-linger, a Central Michigan plant grower, who found this plant amidst his Pro-gressive Everbearing patch.

Westhauser's Gem are grown on new land with all its plant food and mineral elements untouched, therefore, they are **outstanding for vigor and health**, have extra heavy fibrous root system, in fact, their roots are nearly twice the size of ordinary plants..

FOLIAGE. For an Everbearer GEM is a heavy plant-maker and produces a larger fruiting row than any other Everbearer we know of. The plants are very hardy, not subject to leaf blight.

SIZE AND APPEARANCE. The berries are large size, very uniform, and held their size even throughout the dry weather we had last summer. They have the appearance of an over-size Premier berry. The color is a deeper red, very glossy, and they have a very fancy appearance.

FLAVOR. The berries are very sweet and have a flavor like the Pro-gressive variety. The flesh of the berry is very fine grained and red clear through. Very little sugar is necessary to bring out the flavor.

FIRMNESS. The berries are extremely firm and stand long distance shipping well. If you are in the market for an outstanding firm and fancy Everbearer try GEM this year. The supply of course is very limited, as only a few nursery firms are in possession of this great new variety. Play safe, order now.

PRICES SHARPLY REDUCED. We have reduced the price almost to the level of Mastodon and they are in the reach of everybody. Why not try some.

CATSKILL

Introduced by the New York Experimental Station. A cross of Marshall and Premier. In test plots, Catskill has outyielded all other varieties. The plants are very large and sturdy, the fruit stems strong, growing upright. The

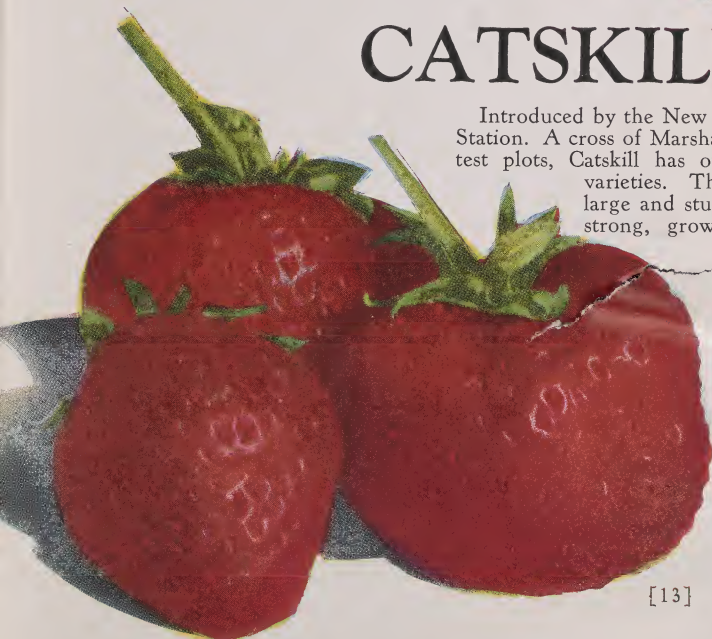

berries are large, have brilliant red color. In quality they compare with Blakemore. Even before Catskill was named it took a medal at the Massachusetts Horticultural Society in Boston. Supply of plants is still limited. On our farms they have been grown on new land and are very thrifty. Try them out in your locality.

County Fair WINNERS

Wisconsin,
Sept. 20, 1935.
Westhauser Nurseries,
Dear Sir: You will be glad to know that my Gem Everbearer berries brought first price at the County Fair. I got the plants of you this spring.
Very truly yours,
MRS. J. C. ALBERS.

NOVELTIES of Proven Value

Egyptian Mum

Finest Rose

Tiniest Rose

"The Tiniest Rose in the World."

Rare novelty. Very dwarf, not over 10 inches. Tiny red buds and pink flowers all through the summer. Very hardy. Ideal for rockery or border. 3 for \$1.00; 12 for \$3.75, postpaid.

Similar to Pink Cushion and Azaleamum, stronger grower and richer color. Blooms from late summer until winter. Rapid grower, starts from small plants to the size of a bushel basket by August, producing 500 to 1000 blooms per plant. 25c each; 5 for \$1.00, postpaid.

Egyptian Mum

Improved Napoleon III

Dark Crimson Red Everblooming Carnation

One of the best, and in my opinion the best double everblooming hardy Carnation ever put on the market. It is a strong, sturdy grower, stands lots of abuse, with ordinary care blooms five months from June to November. One of the few plants that will stand the usual lack of care given in cemetery. Beautiful, red, spicy fragrance. Prices: 3 for 60c; 6 for 90c; 12 for \$1.60, postpaid.

Improved Napoleon III

Tree Strawberry

Or Strawberry Raspberry.

A very unique ornament as well as fruit bearing for the garden. Each year there is a new top growth, 15 to 18 inches high, and the fruit is borne in June on the same season's growth. The roots do not have to be transplanted and are good for many years. The fruit is large, cardinal-red, cone shaped. It is the size of a strawberry. Price: 6 for 60c; 12 for \$1.00, postpaid.

Juneberry

Is a tree-bush, grows to 6 feet high and spreads wide at the top, stems are shiny red in the winter, covered with white blooms early in the spring, thus making it a rare ornamental shrub. The blooms are followed by large grape-sized berries, reddish purple. Flavor like blueberry or huckleberry but not as acid. Edible and relished by all. Price: \$1.00 each; 3 for \$2.50, postpaid.

Cultivated Blueberry

Or Huckleberry.

Not only does the cultivated blueberry or huckleberry produce very juicy and delicious fruit in clusters which are very easy to pick, 2 to 3 times as large as the wild blueberry, but they are very ornamental bushes and can be pruned to the desired height. The foliage is long and narrow, deep green turning to pinkish white blooms in the spring. Price: 85c each; 3 for \$2.25, postpaid.

Chinese Magnolia

(Magnolia Soulangeana)

(Picture in color on page 29).

Let's change "Magnolia" to "Magnificent" for no name could be better suited to this glorious tree. Truly Magnolia is the aristocrat of all flowering ornamentals.

Produces immense flowers in the spring before leaves appear. Leaves, large and glossy. A highly ornate specimen at all times of year. Grows 18 to 20 feet tall. Admirers will come by your home just to see this amazing beauty. 2 ft., \$1.50 each; 2 for \$2.50; 6 for \$6.00, postpaid.

Blue Hydrangea

Picture in Color on Page 29

This Hydrangea has been the most desired of all the Hydrangeas offered to the trade. It blooms in great profusion. See illustration, page

This Hydrangea is a Japanese type that blooms pink flowers on the 1-year stems, followed by blue flowers on the 2-year-old wood. In other words, it is necessary to have 2-year-old wood to have the blue Hydrangea.

We now have a nice stock of these young plants which we are offering to our customers in 8- to 12-inch size at \$1.00, postpaid.

Westhauser's CERTIFIED BLACKBERRIES

Alfred

The coreless Blackberry, originated in Michigan, the state that produces fruit with the flavor. The color is a glossy jet black, the flavor sweet and delicious, and it is nearly seedless and coreless. A hardy plant that produces mammoth berries, often one and three-fourths inches long. It does equally well in cold sections. Why not include a few in your order and get started raising this profitable berry? 1-yr. No. 1, 90c for 25; \$1.40 for 50; \$2.00 for 75; \$2.50 for 100; \$4.25 for 200; \$5.00 for 300; \$8.50 for 500; \$17.00 for 1000. 2-yr. No. 1 (bearing size), \$1.00 for 6; \$1.25 for 12; \$2.10 for 25; \$3.00 for 50 (limit).

Asparagus

is the result of fourteen years experimenting by the United States Bureau of Plant Industry, and as we believe this to be the best, we, like other nurserymen, have discarded all other kinds. The stalks are large and tender, and very productive. One of the most delicious and earliest vegetables grown, develops quickly and is profitable for market or for home use. With but very little care a patch will last for many years.

1-yr., 25 for 50c; 50 for 85c; 100 for \$1.50; 500 for \$3.25; 1000 for \$6.50. 2-yr., 25 for 65c; 50 for \$1.00; 100 for \$2.00; 500 for \$5.00; 1000 for \$10.00. 3-yr. Jumbo, 25 for \$1.00; 50 for \$1.50; 100 for \$3.00; 500 for \$9.25; 1000 for \$18.50.

MARTHA WASHINGTON. This new rust-resisting variety

Eldorado

The choice of the canner and housewife for those good old-fashioned jams, pies, preserves and fresh fruit for the table, coming just after the raspberry season when but little other fruit is available, so people are glad to pay well for it. The canes grow sturdy and upright, and are hardy enough to need no winter protection. The berries are large, uniform in size, jet black, and do not turn red after being picked. They have a flavor that always calls for more and are firm enough to ship to distant markets, assuring good prices. Its hardiness and freedom from disease, especially orange rust, the common enemy of all Blackberries, has brought it into favor with the grower.

ELDORADO T-ROOT PLANTS are sucker plants or shoots which spring up from the roots of the mother plants. 1-yr. No. 1, 80c for 25; \$1.30 for 50; \$1.80 for 75; \$2.10 for 100; \$3.50 for 200; \$4.25 for 300; \$7.00 for 500; \$14.00 for 1000.

ELDORADO ROOT CUTTING PLANTS are individual plants; that is, part of the roots of the old plants are cut off and planted in spring. They produce a nice fibrous root system and a good top growth, therefore they will get a quicker start than the T-roots when planted. We are listing them only a little higher than the T-roots or sucker plants and they are well worth the difference. 1-yr. No. 1, 85c for 25; \$1.35 for 50; \$1.85 for 75; \$2.15 for 100; \$3.60 for 200; \$4.60 for 300; \$7.50 for 500; \$15.00 for 1000.

ELDORADO ROOT CUTTING TRANSPLANTS. If you want a crop of Blackberries this year, our transplanted root cutting plants will do it. They are sturdy and have a fine root system. They have been reset in nursery rows for two years, and will bear fruit a few months after planting. Of this variety, we have only a limited amount, so order now and

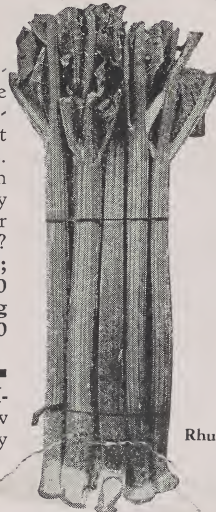

play safe. 2-yr. No. 1 transplants (bearing age), 75c for 6; \$1.10 for 12; \$1.50 for 25; \$2.75 for 50; \$3.25 for 75; \$4.50 for 100; \$7.00 for 200; \$9.50 for 300; \$13.75 for 500; \$27.50 for 1000.

RHUBARB

VICTORIA. Rhubarb should be grown in every garden; it provides material for early spring pies and delicious sauce. It is also valuable for canning. Plant a few roots this spring and you will have a supply of early fruit next year. This wonderful new variety is different from the old sorts. The stems are very large and tender; yields very heavily. 1-yr. roots, 10c each; 6 for 40c; 12 for 50c; 25 for \$1.00; 100 for \$3.00; 1000 for \$18.00.

HORSE RADISH

HORSE RADISH ROOTS do best in rich, loose soil, set slanting and covered two inches. Crowns, each 10c; 4 for 25c.

Rhubarb.

Horseradish.

Asparagus.

Westhauser's Heavy Producing Strain Certified Red Raspberries

Latham

Latham

Originated in Minnesota where the severe winters are a test, but it does not winter-kill even at 45 degrees below zero. This is the largest, most beautiful and profitable red Raspberry grown. Rich, dark red berries an inch in diameter are quite common. They stick to the stem days after they are ripe when other varieties would soften and fall to the ground. The fruit is firm, making it good for canning and shipping, as well as for table use. A heavy bearer. Up to the introduction of the Chief in the red raspberry field, Latham was the Ace of all for quality, size, and also out-yielded the older varieties by a great margin. In an actual official test the Latham outyielded the older varieties by over 3,000 pints per acre on a three-year planting. The fruit ripens about a week later than the Chief and often covers a fruiting season of about 8 weeks. The demand for Latham always exceeds the supply—so order early

Early King An early red Raspberry, one of the first on the market. The plants are very sturdy, and the berries are bright red and ripen evenly. It thrives equally well on heavy or light soil, is remarkably free from disease, and can be relied upon to produce a profitable crop each year.

Chief

Outyields Even the Heavy-Bearing Latham by 20%. Chief is an offspring of Latham but ripens a week to ten days earlier than its parent. It was introduced by the Minnesota State Breeding Farm. The berries are large and firm, do not crumble, are beautiful red and of finest quality. The bushes are hardy and disease resistant with heavy, dark green foliage.

Chief and Latham are two of the most profitable red Raspberries. Highest price for early red Raspberries, that's Chief. Latham to prolong your picking season by three weeks.

While we have a good supply, mechanically dug, extra heavy rooted plants, the demand for these varieties is enormous. Play safe, order early, and receive the benefit of our sharply reduced prices.

Viking

A NEW GIANT RED RASPBERRY. A new hardy variety originated at the Ontario Horticultural Experiment Station, Canada. It roots deep, which enable them to mature a large crop of berries even through a very dry season. The berries are easy to pick, are large, lively bright red, thimble shaped, firm, very attractive and easy to sell. This variety is entitled to a good trial. It may be just the one which does best in your locality. If interested order early, as we have only a limited amount of plants available.

Westhauser's Raspberry Plants are certified disease-free, having been twice state inspected during the growing season.

Chief

St. Regis

(Everbearing Red Raspberry). When partaking of some choice, deliciously flavored fruit have you often wished it would last longer? The St. Regis Everbearer is the answer, as it will produce during the regular fruiting season and until late in the fall. It resembles the Early King in flavor and appearance. If you do not have land or time to grow St. Regis for market, be sure to secure a few bushes for home consumption.

1-Year No. 1 Plants

Newburgh

And here is a new one—The NEWBURGH—introduced by the New York Experiment Station. We have fruited this variety this year and have found them to be a heavy bearer of large, rich red berries, even larger than Latham. The plants are very strong and stocky, and we now believe, as New York does, that we have a variety which will make good for the

fruit grower in a commercial way.

AN IDEAL GARDEN VARIETY

On account of its rich, distinct Raspberry flavor, different from any other. They are so far mosaic immune and our plants are 100 per cent healthy.

We have paid a high price for our foundation stock and the supply of plants of this great new variety is limited. It is advisable to place your order early and have your plants reserved.

Golden Queen Raspberry

The most sought-after golden yellow Raspberry as a novelty for home gardens, a delicacy for eating fresh from the bushes and for table use. The size and shape are very similar to the Cuthbert. The canes are hardy, sturdy, upright growing, almost thorn-free; the rich golden yellow berries are very attractive in appearance. Price, 15c each; 6 for 75c; 12 for \$1.25; 25 for \$2.25.

2-Year Transplants

For Bigger Crops and Larger Profits Buy

New Logan Blackcap

The best dependable early Black Raspberry grown. In some localities where it has been grown for the past few years it has almost displaced the other standard varieties.

Berries are as large as the Cumberland, bears as heavily and ripens a week ahead of Cumberland. This gives the grower a chance to make some real money. One of the New Logan's outstanding characteristics is its resistance to mosaic and other Raspberry diseases. We have a fine lot of thrifty plants to offer.

Prof. J. S. Shoemaker, of the Ohio Experiment Station, has this to say about the New Logan: "If the new Logan does as well elsewhere as it has on the plantation I visited, I would consider it to be the best Black Raspberry introduced since the well known Cumberland. The new Logan seems to possess two outstanding characteristics in particular, both very important ones. First, it seems very highly resistant to virus diseases; second, it begins to ripen a week or so before Cumberland, this giving it a decided advantage for early market."

Westhauser's Raspberry Plants

Are certified disease-free, having been twice state inspected during the growing season.

Oregon.

Gentlemen: I am enclosing money order for an order. I sent you an order for some Black Raspberries last spring. They were the best rooted of any plants I ever bought and every plant lived. They are something to be proud of.

Yours truly,

MYRTLE E. PFEFFERLE.

MICHIGAN STATE DEPARTMENT OF AGRICULTURE ORCHARD AND NURSERY INSPECTION

Certificate of Inspection
No. 1402.

Lansing, Mich.,
November, 1935.

This is to certify that the raspberry fields of WM. WESTHAUSER, Sawyer, have been inspected according to the regulations of this department and those listed on the back of this sheet having been found apparently free from dangerous insects and disease, this certificate is granted and the sale of plants from the approved fields is authorized for the year ending September 15, 1936.

JAMES F. THOMPSON,
Commissioner.

First Inspection made 6-3-'35.
Second Inspection made 8-29-'35.
Bureau of Agricultural Industry,
A. C. Carton, Director.

E. C. Mandenberg,
In Charge of Orchard
and Nursery Inspection.

Black Beauty Raspberry

This Black Raspberry was originated in Ohio. The originator says they are more productive and hardier than the Cumberland. It ripens with the Cumberland and is a large black berry which does not crumble. It is also apparently free from disease. Try a few plants.

Westhauser's LARGE ROOTED, HEAVY-BEARING STRAIN OF Raspberries

Cumberland

The leader among all Black Raspberries. This is the most popular with growers, as it does well in any climate or any well-drained soil. The large, rich, black berries present such an attractive appearance that buyers pay the top-notch prices for them. Excellent for table use and canning. The Cumberland sets so many berries that it is necessary to give them a severe trimming, as the plants could not hold up if all the berries came to mature size.

On the Benton Harbor market, the largest cash fruit market in the world, more Cumberlands were bought than any other Black Raspberry, a fitting testimonial to its high regard by the grower and consumer. In years past we have had to return many late orders with the disappointing words: "Sold out." Moral—Order Early.

Westhauser's Certified Berry Plants

Lucretia

(The Creeping Blackberry).

Produced on a trailing vine instead of a bush, does best when supported on a wire like grapes; free from rust and all fungous diseases. The berries are even larger than blackberries. They are jet black, coreless, sweet and juicy, and ripen about ten days earlier than Blackberries. The Lucretia so far surpasses all other kinds of Dewberries that we have discontinued raising other varieties. No home should be without a Dewberry patch.

1-yr. No. 1: 12 for 55c; 25, 90c; 50, \$1.30; 75, \$1.80; 100, \$2.10; 200, \$4.00; 300, \$4.90; 500, \$7.25; 1000, \$14.50.

2-yr. Transplants (bearing age): 6 for 75c; 12, \$1.10; 25, \$1.50; 50, \$2.75; 75, \$3.25; 100, \$4.50; 200, \$7.00; 300, \$9.50; 500, \$13.75; 1000, \$27.50.

New Thornless Youngberry

Plant Patent No. 4

Something entirely new for the Blackberry-Dewberry family. This Youngberry is absolutely thornless. The bushes grow just like other Youngberry bushes, and are equally thrifty, healthy and hardy. Require no winter protection this far north.

1-yr. No. 1, 12 for \$2.00; 25 for \$3.50; 50, \$4.75; 100, \$7.75; 200, \$15.00; 500, \$27.50; 1000, \$55.00.

Youngberry and Dewberry Transplants

We have a nice lot of bearing age 2-year plants at very reasonable prices. They will more than pay the extra cost the first year. A bargain while they last.

Lucretia

Youngberry

This new berry is so much different from any berry that is grown in most parts of the country. It is a cross between the Loganberry and Dewberry. Color of fruit is a rich wine color. Size 1 to 1½ inches. Flavor is pleasant, sweet, with the tartness of the blackberry. Excellent for table use, canning, jellies, pies, and for wine. The plant is a rank grower. Withstands cold and heat. Adapted to a wide range of soils. A great producer. Try them in your locality. They will be the talk of your neighborhood. Plants are still scarce, and a little high in price. 1-yr. No. 1: 6 for 50c; 12, 80c; 25, \$1.40; 50, \$1.75; 75, \$2.50; 100, \$3.25; 200, \$6.00; 300, \$9.00; 500, \$12.50; 1000, \$25.00. 2-yr. Youngberry

Potomac, Brand New

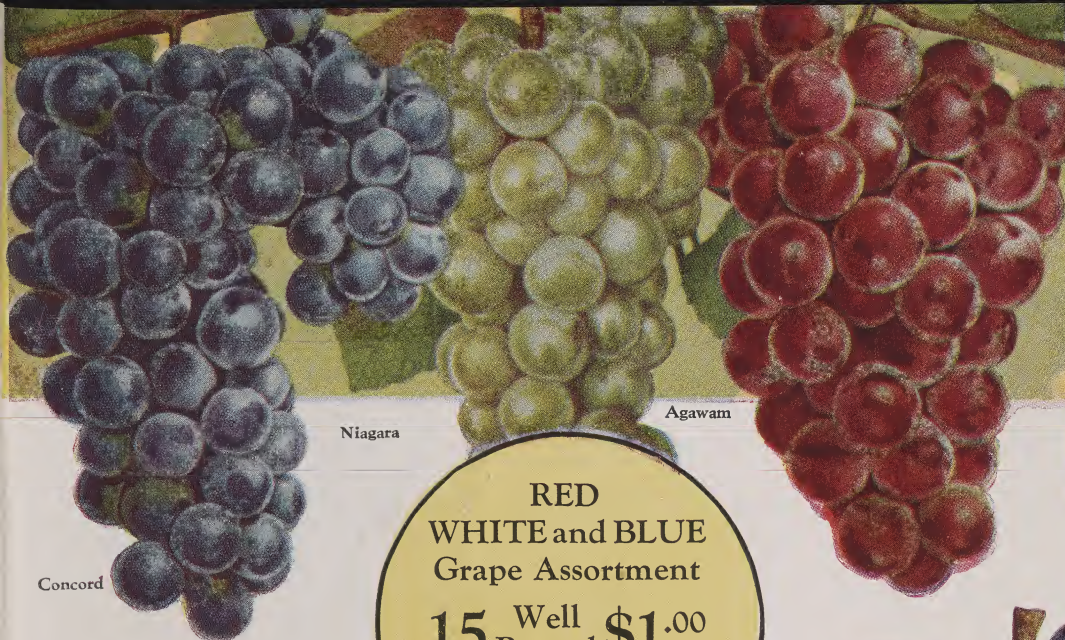

The brand new variety of Raspberry. Introduced by the U.S. Department of Agriculture. It is a cross between a Black Raspberry and a Red Raspberry, making it a Purple Raspberry. Compared side by side with Cumberland, showed about twice as many berries on the Potomac as the Cumberland. It is very free from diseases. Makes fine jellies, and preserves. It is the very best of all the purple varieties. 1-yr. No. 1: 25 for \$1.50; 50, \$2.25; 75, \$3.25; 100, \$4.00; 200, \$6.00.

Crystal White Blackberry

Strange as it may seem, this is a real creamy white Blackberry. Mixed with the jet black ones for dessert it makes a most wonderful dish. The fruit is about the size of Alfred, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden. 2-year bearing age, each 30c; 6 for \$1.25; 12 for \$2.25. 1-year, each 15c; 6 for 60c; 12 for \$1.10; 25 for \$2.00; 100 for \$5.50.

Westhauser's Heavy Rooted Grape Plants

OUR GRAPE PLANTS are known the country over for a fast growing heavy bearing strain. They will produce delicious fruit, when established, for a long time. Many thousands of our customers are reaping both pleasure and profit from their investments.

Concord Is the leading variety for table use, also is supreme for jelly and wine purposes. They grow on all kinds of soil and produce enormous crops of fruit. The bunches are large and compact, the berries are dark blue and very juicy. Many thousand carloads and truckloads are shipped every fall from the great Michigan Fruit Belt. Grape plants are very scarce the country over this year, it will pay you to order early and have your plants reserved.

Niagara (White). This is the leading white Grape grown. Berries are large and fine flavored. Ripens about the same time as Concord.

Moore's Early (Black). Ripens about two weeks earlier than the Concord; large berries and bunches. Excellent for home use and market, and does not winter-kill.

Agawam The bunches are large, shouldered. The berry is of a reddish brown and very tender, with an excellent flavor. Agawam is very vigorous and productive. It is one of the most outstanding Grapes of its class.

Delaware Berries are compactly set, light red, sugary and delicious. A favorite dessert Grape, and among the very best red varieties.

Caco (Red). This new Grape is outstanding for its beauty and quality. Color wine-red, flavor unusually rich, rivals in appearance and flavor Grapes grown under glass. Caco was awarded a medal by the American Institute of New York, a high honor for achievement. 2-yr. only, 45c each; 3 for \$1.25; 6 for \$2.25; 12 for \$4.00.

Extra 3-yr. Bearing Size Grape Plants

We have a limited stock of 3-year, heavy rooted, well branched grape plants of the following varieties:

CONCORD NIAGARA

We are offering them as long as the supply lasts at 30c each; 3 for 75c; 6 for \$1.40; 12 for \$2.50; 25 for \$5.00.

Fredonia Black. A new, very early Grape, originated and thoroughly tested by the New York Experiment Station. Ripens with Portland. The bunch and berry are large with excellent flavor. Ripens fully 10 days before Moore's Early and is an excellent shipper, as it does not crack. This Grape fills a long-felt need—a juicy, delicious black Grape that ripens early. Vine vigorous and productive. One of the best new varieties. 1-yr. No. 1, each 25c; 6, \$1.25; 12, \$2.00; 25, \$3.75; 50, \$6.50; 75, \$9.25; 100, \$12.50.

Westhauser's Hardy Fruit Trees for Profit

Illustrated in Color on Pages 24 and 25

Apples

McINTOSH. (Late Fall). Highest quality for home or market. Beautiful bright red with high, spicy flavor.

JONATHAN. A beautiful, bright red Apple of excellent keeping quality. Fruit is highly flavored and brings a high price on the market. Flesh is tender, juicy and rich. Tree bears early and produces heavy crops for a long period of years.

DOUBLE RED DELICIOUS. This new Double Red Delicious colors about three weeks earlier than the Common Delicious. In August, when the regular Delicious are still green, Double Red Delicious are red all over and are ready to bring fancy prices. We have only a limited amount of these trees to offer. Order early and play safe.

YELLOW DELICIOUS. Bright golden color, sweetly acid flavor. Commands the very highest market prices. Firm, crisp, very juicy. Splendid keeper.

SNOW APPLE. Medium. Deep crimson; flesh white, very juicy and tender.

The above Apple trees in 1-year, 2½ to 3 ft., each 30c; 10 for \$2.75; 25 for \$6.00. 2-year, 3 to 5 ft., each 60c; 10 for \$5.25.

DUCHESS. (Early). Bright colored, delicious, very good to cook. A very profitable midsummer Apple. It has proved to be one of the best varieties under cultivation in the Northwest.

WEALTHY. (Early Fall). A favorite early fall apple; large, green, shaded to dark red; quality very good and tender. Tree is hardy and productive.

YELLOW TRANSPARENT. The very finest extra yellow Apple. It ripens late in July and continues in season until September. Fruit of good size, waxy yellow. Flesh white, mild, juicy and sweet.

TURLEY WINESAP. An Apple that succeeds everywhere. Fruit is dark red, tinged yellow, of rich enticing flavor. A fine eating Apple and sells readily on the market.

The above Apple trees, we have in 1-year only. 2½ to 3 ft., each 30c; 10 for \$2.75; 25 for \$6.00.

NEW ANOKA. Ripens in September. The size, color and flavor of the New Anoka make it a favorite. Also a good keeper. The remarkable feature of this excellent Apple is that it comes into bearing very young, is also dwarf in stature, so that it is well adapted to back yard planting or closer in the orchard. 2-year, 3- to 5-ft., each 65c; 10 for \$6.00.

HYSLOP CRAB. Excellent for preserves and jellies. A heavy, regular producer. Fruit large, red, round and smooth; flesh yellow and sub-acid. 3- to 5-ft., each 60c; 10 for \$5.50.

Cherries

SOUR VARIETIES

EARLY RICHMOND. Earliest Sour Cherry. A very popular and valuable acid variety. Fruit is medium large, bright red and juicy. Fine for pies and canning. Bears a heavy crop yearly. A slender tree which is very hardy.

LARGE MONTMORENCY. Best late Sour Cherry, ripening about ten days later than Richmond. The fruit is extra large, bright red, firm and fine for shipping. A strong grower, perfectly hardy, bears young, and a full crop. 2-year trees, 3- to 4-ft., each 45c; 10 for \$3.90; 100, \$32.50.

SWEET VARIETIES

WINDSOR. A late sweet variety, valuable for market and desirable for home use. Fruit large, dark red. Flesh firm and sweet. Resists rot and clings to tree long.

NAPOLEON. The finest sweet Cherry. Sometimes called Royal Ann. A prolific cropper of extra large, fine quality fruit. A mighty fine variety for eating, canning, or market.

SCHMIDT. An excellent market Cherry. Fruit is very attractive and keeps well. Deep crimson-red color. A heavy producer of extra large, tender, juicy fruit. 2-year, 3- to 5-ft. trees, each 70c; 10 for \$6.50.

Peaches

J. H. HALE. (Midseason yellow freestone). Ripens a few days earlier than Elberta. Fruit extra large, golden yellow with deep carmine blush. Excellent quality and flavor. Tree is large, hardy, and bears young. Does best when grown with Elberta.

ROCHESTER. (Early midseason freestone). Large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone. Peaches and highly desirable for canning. Popular in Western New York and Michigan.

SOUTH HAVEN. (Early). Ripens about three weeks earlier than Elberta; wonderful canner and shipper. Golden yellow in color with a red cheek. South Haven is very popular in all Peach growing sections of the country, returns a handsome profit to the commercial grower. It sells at a premium on account of its earliness in the market.

The above varieties in 2-year trees, 2 to 3 ft., each 25c; 10 for \$2.25. 3 to 5 ft. trees, each 45c; 10 for \$4.00.

ELBERTA. (Midseason yellow freestone). The leading commercial variety. Fruit is large, firm, juicy, making it ideal for canning, storage and shipping. Beautiful golden yellow color with bright red cheeks. Very hardy, vigorous. A heavy bearer. 2-yr. trees, 3 to 5 ft., each 40c; 10 for \$3.80.

GOLDEN JUBILEE. A large, yellow Peach of the Elberta type. It ripens three weeks earlier than Elberta and is of better quality. The skin is yellow blushed with red; flesh yellow, juicy, tender, sweet, freestone. A distinct advantage of the Golden Jubilee is that it ripens early and escapes the Oriental Peach Moth. 2-yr. trees, 3 to 5 ft., each 45c; 10 for \$4.00.

Pears

BARTLETT. The most popular Pear for home use and market, a leader among canning Pears. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with delicious, musky flavor. Tree vigorous, erect, bears abundantly.

BOSC. Finest quality; extra large, long and tapering; russet; good shipper, brings highest market price. A vigorous grower. October to November. 2-yr., 3 to 5 ft., each \$1.00.

KIEFFER. (Fall). Large, handsome appearance, rich golden yellow, sometimes tinted red on the sunny side; bears largest, most consistent bumper crops. Wonderful keeper and an astounding long distance shipper. Tree hardy, very strong grower, bears at an early age, producing phenomenal crops.

SECKEL. One of the richest and highest flavored Pears known; always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October.

The above Pear trees, 2-yr., 3 to 5 ft., each 70c; 10 for \$6.00; 25 for \$14.50, except Bosc.

Plums

YELLOW EGG. Very popular yellow Plum. Rapid grower; hardy, thrifty, prolific bearer. Fruit rich yellow, size medium to large.

GERMAN PRUNE. The most delicious of all Plums. Extra large size, often two inches in diameter. Early and abundant bearer. Combines hardness, immense size, delicious quality, long keeping, beautiful color, small pit; an early and prolific bearer, often producing a good crop in two years after planting. 2-yr. trees, 3 to 5 ft., each 70c; 10 for \$6.00; 20 for \$11.50.

Quince

ORANGE. We list only this one Quince, as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size. 2-yr., 85c each; 10 for \$7.00.

Apricots

MOORPARK. Large, roundish oval, pale orange with a faint touch of red on cheek; yellow flesh; ripens first of August. 2-yr., each 50c; 10 for \$4.50.

All Fruit Trees are Extremely Scarce This Year—Less Than One-Half of the Usual Supply.

Westhauser's Hardy Evergreens

GLOBE ARBOR-VITAE. Perfectly globe-shaped, dense growth, deep green foliage. Popular for foundation and rock garden planting. 10 to 15 in., 50c each; 3 for \$1.25.

PYRAMIDAL ARBOR-VITAE. Excellent pyramidal evergreen. Height 15 feet, width not more than 2 to 2½ feet at base. Tapers to a graceful, slender, pyramidal shape. Foliage dark green. 12 to 18 in., 50c each; 3 for \$1.25.

NORWAY SPRUCE. Deep green foliage, excellent for wind-breaks; an ideal Christmas tree. Fast grower. 12 to 15 in., 25c each; 3 for 60c; 12 for \$1.75.

BLACK HILLS SPRUCE. The hardiest of all Spruce. Bushy in habit, and symmetrical. Foliage varies from a bright green to blue tint. Slow grower, often seen in foundation plantings. 15 to 20 in., \$2.00 each; 20 to 24 in., \$2.50 each, balled and burlapped.

COLORADO BLUE SPRUCE. Its intense steel-blue, glistening foliage makes it desirable for lawn or grouping. Three times transplanted. 12 to 15 in., \$1.00 each; 3 for \$2.00. Once transplanted. 8 to 10 in., 40c each; 3 for \$1.00; 10 for \$3.00.

PFITZER'S JUNIPER. Low, horizontal growing evergreen with bluish tint, foliage fine in texture. They are very graceful and particularly useful for foundation planting, in rock garden and in front of taller evergreens. 10 to 15-in. spread, 35c; 3 for \$1.00.

IRISH JUNIPER. An erect, slender, compact evergreen, 1½ feet in diameter. Used in cemetery planting and landscaping. 12 to 15 in., 35c each; 18 to 24 in., 50c each, balled and burlapped.

GOLDEN ARBOR-VITAE. A very hardy evergreen, bushy; grows up to 4 feet in height. Foliage is light green with a tinge of gold. This variety is becoming very popular. 12 to 15 in., 50c each; 20 to 24 in., 75c each; 3 for \$3.00.

Evergreen Foundation Planting

- 1 PFITZER'S JUNIPER, 12 to 15 in.
- 1 IRISH JUNIPER, 12 to 15 in.
- 1 GOLDEN ARBOR-VITAE, 12 to 15 in.
- 1 COLO. BLUE SPRUCE, 10 to 12 in.
- 1 PYR. ARBOR-VITAE, 12 to 15 in.

ALL FOR \$2.25 Post-paid.

(2 Assortments of the above for \$3.40)

Westhauser's Shade Trees

Chinese Elm

Poplar

Weeping Mulberry

SUGAR MAPLE (Rock Maple). A well-known, native tree, having a very symmetrical, dense head. One of the best shade trees for street or park. This variety is also valuable for sugar making and timber. 3-4 ft., 20c each; 3 for 50c. 5-6 ft., 35c each; 3 for \$1.10.

SILVER MAPLE. Rapid growing tree, producing a quick shade, suitable for street or park. The leaves are irregularly indented, bright green above and silver beneath. 3-4 ft. trees, 30c each; 4 for \$1.00. 4-6 ft., 50c each; 3 for \$1.25. 10-12 ft., \$1.25 each; 3 for \$3.00.

WISCONSIN WEEPING WILLOW. Grows rapidly; has long, fine leaves borne on long, sweeping branches that reach the ground. 5-7 ft., 60c each; 3 for \$1.50. 8-12 ft., \$1.00 each; 3 for \$2.50.

BIRCH, CUT-LEAVED. Tall, slender, graceful white-barked tree with drooping leaves. Presents a very attractive appearance in a single tree. 3-4 ft., \$1.00 each; 3 for \$2.50; 5-6 ft., \$1.50 each; 3 for \$4.00.

CHINESE ELM. Rapid grower, well rounded head; grows to a tall, spreading tree. Almost any soil suitable. 3-4 ft., 25c each; 10 for \$2.00. 5-6 ft., 50c each; 3 for \$1.25. Fifteen 18-20 in. seedlings for \$1.00.

TEAS' WEEPING MULBERRY. Most graceful hardy weeping tree in existence. Forms an umbrella-shaped head with slender branches drooping to the ground. Eatable fruit. Extra heavy specimens, 4-6 ft., \$1.60 each.

CUT-LEAF SUMAC. Small tree, if pruned induces considerable bottom growth. White flowers are borne during June and July followed with red fruits. In fall leaves turn to a beautiful, brilliant red. 3-4 ft., 50c each; 3 for \$1.25.

LOMBARDY POPLAR. Tall and slender tree with bright green leaves and silvery appearance on under side. Suitable for planting along drives and boundary lines; also used for windbreaks and tall screen hedges. 2-3 ft., 25c each; 6 for \$1.25. 5-7 ft., 50c each; 3 for \$2.75.

Wisconsin Weeping Willow

Sugar Maple

Westhauser's Flowering Shrubs

SPIREA ANTHONY WATERER. Bright crimson flowers blooming at the end of June, and if flowers are removed when they fade will bloom until frost. Dwarf grower, not over 2½ feet at maturity. 2-yr., 12 to 18 in., each 25c; 3 for 60c. 3-yr., 20 to 30 in., each 35c; 3 for 80c; 12, \$3.00.

MOCK ORANGE (Philadelphus, Virginal). Strong growing. Grows 8 to 10 feet high. Clusters of extremely fragrant, double flowers in June, continuing intermittently until fall. The finest Mock Orange. 2-yr., 2 to 3 ft. full blooming size, each, 30c; 3 for 90c; 10 for \$2.50.

CORALBERRY (Or Red Snowberry). Medium size shrub, with small pink flowers in the spring and followed by red berries all along the stems, that remain all winter. 2-yr., 20 to 30 in., each, 30c; 3 for 75c.

SPIREA VAN HOUTTEI (Bridal Wreath). Long, graceful drooping sprays covered with a mass of white flowers, blooming in early spring. Very hardy. Much used in all sorts of landscape work. Grows to a height of 6 feet. 2-yr., full blooming size, 24 to 30 in., each, 25c; 3 for 60c. See special bargain offer on back cover page.

LILAC, PERSIAN PURPLE. A decided improvement over the common Lilac. A shrub with slender, arching branches, attaining a height of 5 to 10 feet. The foliage is small, the flowers bright purple. Blooms in May and June. A much more profuse bloomer than the common, and does not sprout so much from the roots. We consider the Persian much preferable for flowerers. 2-yr., full blooming size, each, 30c; 3 for 75c; 10 for \$2.00.

HONEYSUCKLE, TARTARIAN. The finest and best known of the bush Honeysuckles. Has somewhat spreading branches, and bright green foliage. The flowers are of bright pink color, followed by red berries which ripen in midsummer and cling to the bush for several weeks. 2-yr., each 25c; 3 for 60c; 10, \$1.75.

FLOWERING QUINCE. Bright scarlet flowers in May. Medium large bush. Fine for specimens, shrub masses or may be pruned for hedging purposes. 2-yr., 20 to 24 in., 30c each; 4 for \$1.00.

FORSYTHIA. Golden yellow, bell-shaped flowers which appear very early in the spring before the leaves come out. One of the very first shrubs to bloom. Grows 6 to 8 feet high. 2-yr., 30c each; 3 for 75c.

HYDRANGEA A. G. Large, snowball-like clusters of flowers lasting from June to late August. Shrubs attain about 4 feet in height. Very handsome appearance. 2-yr., 2 feet or better, each, 30c; 3 for 75c.

HYDRANGEA P. G. Blooms from July to September. Starts with a white bloom which turns pink; large bushes and showy. 2-yr., 18 to 24 in., each, 25c; 3 for 60c.

SNOWBALL. Well known; flowers grow in large, ball-like clusters, snow-white; blooms early. 2-yr., 2 to 3 ft., each, 35c; 3 for 90c.

RED-LEAF BARBERRY. (*Atropurpurea*). A brilliant accent shrub as solitary specimen or in a group amidst duller foliage. An exact reproduction of Thunbergi in every respect except color; this variety starting off in its foliage a warm bronzy red; the heat of summer intensifying its red brilliancy; autumn adding other tints to its richness. The abundant scarlet berries persist throughout the winter along the dense network of spiny twigs. A sunny exposure is necessary for color. 3-yr., each 30c; 3 for 75c.

SNOWBERRY. A popular, graceful shrub of medium height, having small pink flowers in spring. Large snow-white berries in fall which persist nearly all winter. 2-yr., 18 to 24 in., each, 25c; 3 for 75c.

TAMARIX, AFRICANA. Graceful shrubs with feathery foliage and large panicles of showy flowers. Relatively hardy. A moist, sandy or loamy soil is well adapted to them. Splendid for seaside planting or other damp places. Particularly attractive in combination with other shrubs adding interest by contrast with ordinary foliage. 2-yr., 2 to 3 ft., each, 30c; 3 for 75c.

WEIGELA ROSEA. This is a very vigorous grower with spreading, bushy habit, and is covered with fine, rose colored flowers in May and June. The flowers are large, showy and somewhat bell-shaped; leaves quite large and dark green. Very popular. 2-yr., 20 to 24 in., each, 30c; 3 for 75c.

FLOWERING ALMOND. Covered with small, roselike pink flowers before the leaves come in the spring. Blooms very early. Attains a height of 6 to 8 feet. 2-yr., 18 to 24 in., each, 40c; 3 for \$1.00.

PURPLE WISTERIA. Large clusters of purple pea-shaped flowers. Compact leaves. Fine for pillars and arbors. Strong 2-yr. vines, each, 40c; 3 for \$1.00.

Spirea Anthony Waterer

Persian Lilac

Snowball

Honeysuckle, Tartarian

Hedge Plants

AMOR RIVER PRIVET. The hardest of Privets. For hedges, plant one foot apart. 18-24 in., each 10c; 12 for 75c; 100, \$6.00.

CALIFORNIA PRIVET. This variety has long been known as one of the most beautiful hedging plants. It grows rapidly and is free from insects and scale. Leaves are dark, glossy green. Not dependably hardy in some northern sections. 18-24 in., each 10c; 12 for 75c; 100 for \$6.00. 2-3 ft., each 20c; 3 for 55c; 12, \$2.00; 100, \$9.00.

Dahlias

This assortment consists of the best American and foreign varieties.

MRS. I. DE VER WARNER. Color a deep mauve-pink on a stout stem, a good grower and blossoms freely. Measures 10 inches in diameter. 20c each; 6 for \$1.00.

DR. TEVIS. The color is a soft salmon-rose suffused with old gold, with golden apricot center. The flowers are about 7 to 9 inches through. 20c each; 6 for \$1.00.

PRIDE OF CALIFORNIA. Without a doubt the best of the red decorative Dahlias; vigorous grower and a very fine bloom; large, deep red flowers. 20c each; 6 for \$1.00.

MRS. WILSON. Lilac-lavender, very large, stunning exhibition flower. Do not fail to include this variety in your collection. 20c each; 6 for \$1.00.

AVALON. Chrome-yellow. Stem equal to Jersey's Beauty. Flower ideal in every way, 8 to 10 inches through. Do not fail to include this marvelous yellow in your collection. 20c each; 6 for \$1.00.

BASHFUL GIANT. A large Dahlia in red and yellow; belongs in any first-class collection. 20c each; 6 for \$1.00.

SAGAMORE. Light copper or golden amber shaded orange-buff. 20c each; 6 for \$1.00.

LAVENDER GEM. Clear shade of lavender-pink. 20c each; 6 for \$1.00.

New Rainbow Gladiolus Assortment

20 or more varieties; all blooming size; gorgeous at blooming time. Beautify your yard by a planting of these Gladiolus.

12 for 25c; 75 for \$1.00; 100 for \$1.35; 300 for \$3.00; 1000 for \$8.50.

Mixed Dahlia Assortment

Chinese Magnolia
(Description on page 14)

In the latter part of the season, if some varieties you wish are sold out, we substitute a variety as good or better than the one ordered, unless you specify "No Substitute."

**TREE HYDRANGEA
P. G.**

Tree form of the famous Hydrangea P. G. The large white panicles of flowers turn rose colored in autumn. Height at maturity, 5 ft. **Strong**, 2 to 3 ft., each 60c; 3 for \$1.50.

**HIGH BUSH CRAN-
BERRY**

A magnificent shrub, of upright, spreading form, bright green leaves. Produces small, white flowers borne in broad, flat clusters followed by scarlet berries. 18 to 24 in., each 35c; 3 for \$1.00.

PRUNUS TRILOBA

One of the most beautiful of flowering trees. Very early in spring, before its leaves appear, the small tree is decked in a fleecy cloud of double light pink blossoms. 18-24 in., each 35c; 3 for \$1.00.

**PURPLE LEAVED
PLUM**

A very remarkable and beautiful tree, with striking pinkish purple leaves in the spring that deepen in color with the season. Single, white flowers. Very ornamental for lawn planting. Each 75c; 3 for \$2.00.

Correct Planting Booklet

Forty-eight pages of valuable information on planting, pruning and general care of plants, shrubs, trees, etc. Everyone interested in plants should have this book. Supply limited.

Berry Planting Instructions

HOW TO PREPARE THE SOIL. The depth of plowing or spading should be 6 to 8 inches. Then the soil should be well pulverized and levelled up smoothly. We recommend fall plowing; this gives the soil time to settle and the vegetation has time to decay. If the soil is not too soddy, spring plowing is successful. After the ground is plowed it can be levelled off with a roller or cultipacker. In other words, well drained soil which will grow such crops as corn will grow strawberry and raspberry plants successfully.

HOW TO PLANT STRAWBERRIES. For commercial planting we recommend that rows be about 3 feet 8 inches apart, and plants set about 14-18 inches in the row, requiring about 8500 plants per acre. Holes for setting plants may be made with a dibble, trowel or an ordinary spade. Do not plow furrows and put plants in them, as that leaves the ground too loose for good results. For garden culture the rows may be made closer and for hill culture the plants may be planted about 24 inches apart each way.

REMOVAL OF FLOWER STEMS. Soon after the plants are set in the field, flower stems are usually produced. These should be removed as they appear, probably before the blossoms open.

The production of flowers and fruit at this time will decrease the vigor of the plants, and the production of runners.

With fall bearing varieties the blossoms are removed until about July 1st, after which time the plants are allowed to fruit. Cultivate frequently to destroy weeds, and conserve the moisture, and you will be assured of a good crop, for Westhauser plants are healthy, strong and ready to produce fruit for you.

PLANTS REQUIRED TO SET AN ACRE

	Plants
Strawberries (commercial use)	3 ft. 8 in. x 1 1/2 ft. 7,920
Strawberries, Everbearing	2 1/2 ft. x 1 1/2 ft. 11,600
Strawberries (garden use)	2 1/2 ft. x 1 1/2 ft. 11,600
Black Raspberries	7 1/2 ft. x 3 1/2 ft. 1,777
Red Raspberries	6 ft. x 3 ft. 2,420
Blackberries	7 ft. x 3 1/2 ft. 1,777
Dewberries	6 ft. x 3 ft. 2,400
Currants	5 ft. x 4 ft. 2,200
Gooseberries	5 ft. x 4 ft. 2,200
Grapes	8 ft. x 10 ft. 540
Grapes	8 ft. x 12 ft. 440

SPACING DISTANCE FOR FRUIT TREES

Apple	30 to 40 feet apart each way
Peach	16 to 20 feet apart each way
Sour Cherry	16 to 24 feet apart each way
Sweet Cherry	20 to 30 feet apart each way
Pear	18 to 24 feet apart each way
Plum	18 to 24 feet apart each way
Apricot	18 to 24 feet apart each way

Prosperity Flower Garden Assortment

AT A REAL BARGAIN

- 8 Dahlia bulbs, collection, page 28.
- 50 Gladiolus bulbs. Blooming size, our Rainbow collection, page 28.
- 12 Chinese Lantern roots, page 28.
- 12 Red Hot Poker or Torch Lily roots, page 28.
- 8 Giant Flowering Cannas, cover page.

REGULAR PRICE, **\$3.00**
\$4.25, ONLY

Sensational Shrub Offers

12 strong, 2-yr. Spirea Van Houttei, 24-30 in., full blooming size, for \$1.00; 20 for \$1.50; 100 for \$5.00.
